Southeast Rock Groundwater Contamination Site  
Superfund/Technical Reports

Dear Mr. Hart

The Illinois Environmental Protection Agency (Illinois EPA) is in the process of conducting groundwater monitoring of existing wells in the Southeast Rockford Groundwater Contamination Site (SERGC). As a part of this process Illinois EPA is replacing existing locks on wells with new locks. To this point in time, Illinois EPA has replaced locks on the following groundwater monitoring wells: 102 A, B, and C; 103 A, B, C, and D; 106 A, B, and C; 133 A, B, and C, 134 A, B, and C; and 136. Illinois EPA is aware that other parties may be sampling these wells in connection with the activities related the SERGC as is the case with groundwater monitoring well 133 A, B, and C which is sampled by the City of Rockford. A key to these wells can be made available upon request to Thomas Williams Project Manager, or through Jason Thorp, Superfund Coordinator Rockford Regional Office. As the project continues Illinois EPA will continue to perform maintenance including the replacement of locks on groundwater monitoring wells.

Please give Illinois EPA fourteen days or more notice on any request for access to these wells. If you have any questions, please feel free to contact me at the telephone number 815-223-1714 or Terry Ayers at 217-524-3300.

Sincerely,

A handwritten signature in black ink, reading "Thomas C. Williams". The signature is fluid and cursive, with the first name "Thomas" and last name "Williams" clearly legible.
